

West Jersey Astronomical Society presents a public

STAR WATCH

**Friday, October 25th
Beginning at 5:30 pm**

***Rain date - Saturday, October 26th**

At Atsion field in Wharton State Park
behind the Atsion Ranger Station in Shamong, NJ

Join the astronomers of West Jersey Astronomical Society for an evening of astronomical discovery under the reasonably dark skies of Atsion Field. You will see Jupiter and Saturn early in the evening saying goodbye to the summer sky and welcoming the fall constellations. Some of the highlights will include:

- ★ M11 wild duck cluster ★
 - ★ M57 The Ring Nebula ★
 - ★ Double cluster ★
 - ★ M31 Andromeda Galaxy ★
 - ★ NGC 457 ET Cluster ★
 - ★ M15 Globular cluster in Pegasus ★
 - ★ NGC 404 Ghost of Jupiter in Andromeda ★
 - ★ M36 M37 M38 open clusters all lined up in the chertier ★
 - ★ M81 M82 bright galaxies in the Great Bear ★
- These are only a few of the Gems available for the evening!

Any questions please contact
Bernie Hosko, Star Watch Director
text/call: (856)535-0792; email: bighos@comcast.net

*If inclement weather is expected, please check West Jersey
Astronomical Society's website for further information
